

freestyle

Small and virtually invisible

freestyle is the small, practically invisible hearing system which combines the latest digital technology with beautiful, timeless design.

Comfortable and easy to use

The latest generation of this trusted and successful hearing system has been systematically re-developed and is now even more comfortable to wear and even easier to operate.

The unique shape allows the loud speaker to be placed directly in the ear – for an almost natural feeling of hearing.

Communicating without difficulty

With two different technical specifications, *freestyle* is available in **BASIC** and **COMFORT** versions. But whichever version you choose:

With *freestyle* you will be able to participate actively in life again, free and unencumbered.

Hello

Approximately 15% of the world's population suffer varying amounts of hearing loss due to a variety of causes.

Nowadays there are better and better options for overcoming hearing loss through the use of modern technology.

Technology alone however does not make for a good hearing instrument. Comfort for the wearer and attractive design are also vitally important.

We at **bruckhoff hannover** are specialists who for many years have been setting the standard in hearing loss solutions, both technically and in terms of comfort and good design.

With **freestyle** you have a genuine top quality product, made in Germany, which we are certain will give you lasting pleasure.

BASIC and COMFORT

You can choose between the two **freestyle** systems:

- BASIC
- COMFORT

Both systems are finished to a very high quality and offer maximum wearing comfort.

The **COMFORT** version has additional adjustment options and an even better sound image.

The following overview will help you and your hearing instrument specialist select the hearing system that is right for you.
