Flexible in any situation

The unique shape allows for quick and easy handling in all usual situations.

Trouble-free communicating

freestyle CL 210 TID is a perfect combination of hearing and tinnitus instrument. The customer is able to adjust the noise level with the volume control according to his personal needs.

Small and virtually invisible

freestyle CL TID is the small, almost invisible tinnitus system, which combines beautiful, timeless design with the latest digital technology.

Comfortable and easy

The latest generation of this trusted and successful system has been systematically re-developed and is now even more comfortable to wear and even easier to operate. Disturbing tinnitus noises are hardly noticed with *freestyle* CL TID.

Hello,

in Germany alone, some 8 million people suffer from excessive ear noises. These noises which have no discernable source are known as tinnitus.

Nowadays there are better and better options for neutralising such noises through the use of modern technology – leading to a noticeable improvement of the quality of life.

At the same time, almost all sufferers seek a system that is discreet and

comfortable, that looks good and is easy to operate.

We at **bruckhoff hannover** are the specialists in providing solutions and for many years we have been setting the standards, both technically and in terms of comfort and good design.

With **freestyle CL TID** you have a high quality product “Made in Germany“ which we are certain will give you lasting pleasure.
