

## Put on your glasses, see and hear clearly!

The hearing module *la belle* developed and designed by **bruckhoff hannover** makes it possible.

## Small and multi-functional!

*freestyle CL 210 TID* is a perfect combination of hearing and tinnitus instrument. The user himself is able to adjust the noiser to his own personal needs.

## For your own fancy glasses!

The PREMIUM-version of the bone conduction *la belle* BC features multi-channel and multi-microphone technology and can be fitted on almost any spectacles of your own personal choice. By means of our contact pressure device it can easily be checked whether the spectacles meet the technical requirements.
